A N

Index to Interest:

CONTAINING,

- I. The largest Tables of *Simple Interest* that have yet been made Publick; shewing the same, at once, for any number of Days in the whole Year, and thence Annually to 20 Years, at all the usual Rates.
- II. A Table of Discount for any number of Days not exceeding 365.
- III. Two Tables shewing, by Inspection, the present Worth of Annuities and the Purchase thereof; all done in Vulgar Numbers without Decimals.
- IV. An easie Table for the valuation of any number of Years Lapsed in a Church or College-Lease of Land, shewing the Fines payable at one View.
- V. Tables of the Amount and present Worth of any Sum of Money, and of Annuities to 61 Years, and Rules to apply them for 120 Years.

A L S O

The full Use of all the Tables; and how the same may be calculated and examined by Vulgar, Decimal, and Logarithmical Arithmetick, and the *Simple Interest* also by Practice. Likewise easie Rules for Valuation of 1, 2, and 3 Lives.

T O G E T H E R

With a new invented Circle for the easie finding the number of Days contain'd between any Two in the Year.

Useful for Lawyers, Merchants, Scriveners, and all others who Receive and Pay Interest-Money.

The Second Edition, Corrected and Amended.

By E. HATTON, *Philomath.* *R*

A short and easie Rule to examin the Truth of any Number in the Simple Interest Tables by Addition.

IF the Number you would examin be the Interest of a Sum above (1) and
exceed not (10 l.) add the Number standing next above it to the Inte-
rest in the same Column against 1.

If the Number you would examin be the Interest of a Sum above 10,
and exceed not 100 l. add the Number next above it to the Interest in
the same Column against 10.

And if it be the Interest of a Sum above 100 and exceed not 1000 l.
add the Number next above it to the Interest in the same Column against
100 l. and the Sum is equal to that which you Examin, if there be no Error.

Thus the Interest of 200 l. added to that of 100 l. for 252 Days is
12 l. 8 s. 6 d. 2 q. which proves the Interest of 300 l. for that Time, to
be right at 6 per Cent.

But Note, That it will sometimes happen that the said Sum will be
a Farthing short, occasioned by the parts of a Farthing taken notice
of in the Calculation, several of which, together, make that odd
Farthing; so that the Number you Examine is right, notwithstand-
ing that small difference.

**BOOKS Printed for Jonas Brown, at the Black
Swan without Temple-Bar.**

Cosmography in Four Books. Containing the Chorography and
History of the whole World: And all the Principal Kingdoms,
Provinces, Seas, and the Isles thereof. By *Peter Heylyn, D. D.* Im-
prov'd with an Historical Continuation to the present Times, By
Edmund Bohun, Esq; With a large and more Accurate Index, than
was in any of the former Editions, of all the Kingdoms, Provinces,
Countries, Inhabitants, People, Cities, Mountains, Rivers, Seas, I-
lands, Forts, Bays, Capes, Forests, &c. of any Remarque in the
whole World: Revised and cleared from a multitude of Mistakes,
which had crept into former Impressions. And Five New-Engrav'd
Maps, according to the best and most exact Projection.

The Young Accomptant's Debitor and Creditor; or an Introducti-
on to Merchants Accompts after the *Italian* manner. In an easie and
plain Method altogether New. Adapted to the Concerns of Young
Gentlemen. To Gentlemen who manage their own Estates. To
those in Publick Offices; To Tradesmen, and to all Persons that
desire to be exact in Accompts. The Second Edition. By *Abraham
Nicholas*, Writing-Master, near *Austin Fryers*.

A Guide for Book-Keepers, according to the *Italian* manner now
in Use. Directing Accomptants where the Usual Occurrences in
Trade are to be Enter'd, and in the Stile proper for such Entrances.
By *Charles Snell*, Accomptant, Master of the *Free Writing-School* in
Foster Lane. Price 1 s.

*Panegyrical Lines on this Book, En-
titled, An Index to Interest.*

HERE all who pay or lend may quickly know
(By this most useful *Index* pointing to)
The precise Loan they want; for, Reader, Mind
How *Labour* with *Exactness* are conjoin'd.
Here *Plainness*, *Copiousness*, *Accuracy*,
Join Hand in Hand, and only here agree.
Of all the Books of *Interest*, yet set forth,
None's to be found containing near its Worth.
So *Portable*, and yet *Exhibits more*
Than the most bulky Volume did before.
Hereby the meanest Servant soon may find,
His Wages due for any Days assign'd;
Houses, Lands, Incomes have their Values here,
In present, or Reversion, shewn most clear.
And New-invented curved Scales here are;
Measuring the Day 'twixt any in the Year.
Which add so largely to the Estimate
As leaves no room t' object against its Rate,
The Book's so full and every way Compleat.
And when 'tis Scaree, or out of Print, you'll see
The Currant Price will Quadruple be.

TO the Right Honourable

H U G H

Lord *Willoughby* of *Parham*.

My LORD,

HAVING Your Lordship's Permission for a Favour of this Kind: I have, with great Humility and profound Respect, taken the Liberty of this Dedication; but shall not presume on that Freedom (as is usual by some) to attempt an Account here of Your Lordship's great Worth, that being sufficiently apparent to all who know Your Lordship, and not very material to insist upon to such as do not. In this short Address therefore, I shall rather crave Pardon for the Impoliteness of the Title, and the very many Imperfections of the Author, who must acknowledge the Commonness of the Subject here presented, yet Hopes that the Usefulness thereof, and the Copiousness of the Tables (which exceed all others

The Epistle DEDICATORY.

others by many Thousand Numbers) together with their Facility of being Understood and Us'd, will make them generally Acceptable, especially to the *British* Nation, and consequently to Your Lordship, who hath a natural Propension and generous Inclination to incourage whatever tends to the Good and Welfare thereof.

May You ever enjoy that Felicity (which is the Reward of such Virtues) is the sincere Petition of

Your LORDSHIP'S

Most Obedient and

most Faithful Servant,

EDWARD HATTON.

TO THE READER.

IT may be thought strange by some, that I should Publish a Book of Interest, when there are so many already Extant; but it may be consider'd by such, (as it is well known by those who frequently use Tables) That there are very few or none so Easy and Copious as could be wish'd; and on that Account I was prevail'd upon by some Gentlemen in the Law, to undertake the following laborious Work; and now 'tis finish'd in so commodious a Volume, I doubt not but it will be acceptable to Lawyers, Merchants, Scriveners, and to all others who either Lend or Borrow Money, a Tenth Part of whom may not perhaps understand Decimals, nor have leisure to spend so much Time and Pains as is necessarily required to discover the Interest by other Tables, which a judicious Accountant can almost as soon compute de novo.

I have endeavour'd therefore to avoid both these Inconveniencies, not only by exhibiting the Interest in plain Vulgar Numbers, as Pounds, Shillings, Pence and Farthings, but also by inserting in one distinct Sum, the Interest for any Number of Days in the whole Year, and thence Annually to 20 Years, which I have done at the Four most usual Rates, as 5, 6, 7, and 8 per Cent. by which you have brief and easie Rules given, on Page 91, to find the Interest at 1, 2, 3, 4, 4 and a half, 9, 10, &c. per Cent. And Uses the 6 and 7, Page 92, shew how the Interest is found by the Tables from 1s. to 10000l. And these Tables being thus particular, do also shew the Wages due to any common Servant at the said Rates per Annum, as I have given Rules on Page 91.

As for the business of Compound Interest, I have adapted Tables the 6th and 7th, to the Use of those who understand little or nothing of Arithmetick, where are Answers to the most Useful Cases, viz. those relating to Buying and Selling Leases of Lands and Houses, &c. by Inspection, to one Farthing, without the Trouble of Decimals, or the Multiplication thereof, which have render'd this Useful Part to the greatest Number of Readers unintelligible.

The Tables for the Valuation of the Leases of Church and College Lands are Plain, Easy, and Exact, and I doubt not but it will be granted me, that they are far better than any yet published of that Kind, of which I know but two, the first was written by the Reverend John Newton, Dr. in Divinity (and one of the King's Chaplains) Anno 1683: which contains only Lines, or Value of 1l. per Annum Rent, all in Decimals. The other is said to be approv'd by the same Newton; it has the answers in Years, Quarters, Months, and Decimals of a Month Purchase, which varies often some Shillings from the Truth (I suppose more than the Landlords would care to abate, or the Tenants to over-pay); besides, this Table is very tedious in its Use, by this Example appears (it is the 2d instance of the Use of my Table of this nature), which is to know the Fine payable, when 9 Years are Elaps'd of a Lease of 21 Years, and the Rent 147 l. per Annum. His Answer is by one Table, 1 Year, 1 Quarter, 2 Months, and 3 tenth parts of Months Purchase, which the Author computes by another Table.

l. per An.		l.	s.	d.
147	for 1 Year	147	00	00
100	1 Quarter	25	00	00
	2 Months	16	13	04
	1/3 of a Month	4	03	04
40	for 1 Quarter	10	06	00
	2 Months	6	13	04
	1/3 of a Month	1	13	04
7	for 1 Quarter	1	15	00
	2 Months	1	03	04
	1/3 of a Month	0	03	10

l. 147 Total l. 214 : 07 : 06

consequently the Tenants do make so much of their Money, and upon the foot of this I have in my Table the 21st.

But all this is done by 3 Lines, and that taken out of one and the same Table, as appears p. 119. of this Book, where the Answer is but 214 l. 7 s. 2 d. 3 q. and in other Examples his is several Shillings too little.

The said Reverend Dr. Newton's Table was computed decimally for 1l. per Annum, to the hundred thousand part of a Pound, which he dedicated to the Arch-Bishop of Canterbury and Bishop of London, and calls that part Directions to Deans and Chapters in Cathedrals, and the Heads and Fellows of Colleges in both Universities; it is computed at the rate of above 11 l. per Cent. which they allow their Tenants,

And

To the Reader.

And because there has not been, that I know of, any thing in Books of this Kind directing any tolerable measure, the Valuation of Annuities for 1, 2 and 3 Lives, but what the learned Mathematician Mr. Halley has written; I have therefore shew'd how he valueth one Life according to its Age, and upon that Foundation have given Rules, which I think will hold true enough in valuing 2 and 3 Lives; but I have omitted what that great Author says thereon, because I thought his way of Valuing 2 and 3 Lives, could hardly be reduced to common Practice by most of those concerned in these Affairs.

I have endeavour'd in the Use of all the Tables to be as plain as possible, and I think any one (who can but do Addition and Subtraction) may thereby be able to resolve all Cases that do commonly occur. I have, 'tis true, been oblig'd to Publish part of the 9th and 10th Tables in Decimals (they being more rarely us'd) and partly because I wou'd not have this Book swell beyond the compass of a very portable Pocket-Book; but the Use even of those Columns is very easy to any that can do common Multiplication; and the little Table, Page 92, sheweth how to Value any Decimal by Addition only. And as to Columns, the 4 of the 9th and 10th Tables have made the 6th Table; 5 and 7th from them, which are in plain, Pounds, Shillings and Pence. I have wholly new calculated all the Tabular Numbers of the several Columns in the 9th Tables 9 and 10, and where I have found them to differ from others, I examin'd mine over and over, because it is too common for one Author to take them from another, without Examination. I have also shew'd how those which extend to 81 Years may be us'd, in resolving Questions that require the Amount or present Worth of any Sum of Money, or of any Annuity up to 122 Years; and have likewise shew'd a very brief way of doing the same by Logarithms, whereby Questions of Compound Interest may be resolv'd in less than a quarter of an Hour, which would require a Days time or more, by the common way of Calculation.

In short, Truth and Perspicuity have been my principal Aim throughout the whole, and have not taken one Number upon Trust. And as I have been very careful in the Calculation, so have I been in Examining every Number after the Press, that their Truth may be dependant on.

The Circle of Time at the end of the Book which I have contriv'd as the most Natural and frequent occasion for its Use to have it done in Brass, because by that means the Position of its Parts will be more steady, and the whole more durable.

I have been better than what I promis'd in my Proposal to Subscribers, in several respects particularly in giving them a Table of Discount. 2ly, A Table of Guineas. 3ly, A Table of the Weights of Gold and Silver Coin. And 4ly, The Valuation of Estates for Lives.

If it be objected that the Bulk is but small for the Price, which is 5 s. in Quires, I would answer such Persons never to rate a Book by the Voluminousness, but by the Quantity of valuable Matter therein contain'd; for I will engage to procure a Book or two of the same subject to this, of as large a Price and bulky to a Fault (being not fit for the Pocket), which yet have above a 4th part of the Tables and useful Matters therein which this contains; and had I been assur'd that Men of Business are for having these Books multum in parvo, I could not have made this Book (which contains near 6000 Tabular Numbers) a Book of 19 s. Price.

Simple Interest at 5 per Cent (Interest of 1. for 1 Day is .000136986:01:6)

The Explanation and Use of the Circle of Time, and of the Tables of Interest and that of Discount foregoing.

SECT. I. The Circle of Time.

IN Order to the most easy and speedy finding the Number of Days, contained between any Day of one Month, and any other Day of the same, or of any other Month: I have contrived a Circle, divided into Twelve Months, and each Month into its respective Number of Days, and then to agree with that, there is another Circle to turn round within the former, whose Divisions or Parts are 365 Days (close to the former) but without any regard to the Months, the Parts of this Inner-Circle being numbered from 1 to 365. So that when you would know how many Days it is between any two Days of any two Months, or of the same Month.

Turn the beginning of the Divisions, or the Hand, (or Index-Part) in the Inner-Circle of Days, to the Day of the Month you reckon from, in the Outer-Circle, and right against the Day you reckon to, in that Circle of Months, you have the Number of Days in the Inner-Circle for Answer.

Note: If February is one of your Months, when its Leap-Year add One.

Example. How many Days is it from the 17th Day of March, to the 9th of December next following: Set the Hand in the Inner-Circle to March 17th in the Outer-Circle, and right against December the 9th in that Outer-Circle, you will find 257 Days in the Inner-Circle.

SECT. II. The Use of the Tables of Simple-Interest.

Simple (or Single) Interest, is the Interest arising from the Principal only, and is called so to distinguish it from Compound-Interest, or that which comes of the Principal and Interest. As the foregoing Tables are very Copious, so the Use is the more easy and Obvious, for Example;

The Use of the Tables of Simple Interest.

91

Use 1. What is the Interest of 700 l. for 319 Days at 7 per Cent.

Look in the Column next the left Hand for your Principal 700 l. and then in a right Line towards the Right Hand, under 319 Days, you have the Interest 42 l. 16 s. 6 d. the Answer at once.

Use 2. When you have two or three Digits in your Principal, then you may take the Interest out at two or three times, as admit you would have the Interest of 1340 for 221 Days at 7 per Cent.

	l.		l.	s.	d.	q.
Against the Principal	{ 1000 }	you have under 221 Days	{ 42	7	8	0
	{ 300 }		{ 12	14	3	2
	{ 40 }		{ 1	13	10	3
	1340	Total Answer	56	15	10	1

Use 3. But if your Principal consists of three Figures, not exceeding 365, you may find the Interest at once, provided your Days have but one Digit in them. Thus if it were required to know the Interest of 345 l. for 200 Days at 7 per Cent. this being the same as 200 l. for 345 Days, look against 200, and under 345 Days (as in the first Example of this Section) and you will find the Interest 13 l. 4 s. 7 d. 3 q.

Use 4. If it were required to find the Interest at 1, 2, 3, 4, 9, 10, &c. per Cent. which Rates have no Tables in this Book; the Interest is however very easily and briefly found according to these Rates of Interest by the Tables foregoing, and these few short and plain Rules, viz.

If you would find the Interest of any Sum at 1 per Cent. take one Fifth of the Interest at 5 per Cent.

If at 2 per Cent. take one Third of the Interest in the Table of 6 per Cent.

If you would know the Interest of any Sum at 3 per Cent. per Annum, take half of what it comes to, by the Table foregoing of 6 per Cent.

If the Interest is sought at 4 per Cent. take half of what it amounts to by the foregoing Table of 8 per Cent.

If the Interest is required at 4 and a half per Cent. deduct one Fourth of what it comes to at 6 per Cent.

If you would have the Interest at 9 per Cent. add half of what the Interest comes to at 6 per Cent.

If the Interest be demanded at 10 per Cent. take the double of what it is at 5 per Cent. as by that Table.

Examples.

- What is the Interest of 700 l. for 229 Days at 3 per Cent.
The Interest of 700 l. for 229 Days at 6 per Cent. 26 7 00
Half of which is the Answer, viz. 13 3 00
- What is the Interest of 700 l. for 229 Days at 4 per Cent.
The Interest by the Table at 8 per Cent. is 33 2 01
Half of which is the Answer, viz. 17 11 42
- What is the Interest of 700 l. for 229 Days at 4 and a half per Cent.
The Interest as before, at 6 per Cent. is 26 7 00
A Fourth of which deduct, viz. 6 11 90
The rest is the Interest at 4 and a half per Cent. 19 15 30
- What is the Interest of 700 l. for 229 Days at 9 per Cent.
The Interest by the Table at 6 per Cent. is 26 7 00
To which adding half thereof, viz. 13 3 60
The Sum is the Answer 39 10 60
- What is the Interest of 700 l. for 229 Days at 10 per Cent.
The Interest at 5 per Cent. by the Table is 21 19 20
To which add it self 21 19 20
The Sum or Answer at 10 per Cent. is 42 18 40

Use 5. Another Use of this Table is to find what a Servants Wages comes to: Thus, suppose a Servant has 7 l. per Annum, and has been 173 Days with you, look under 173 Days against 100 in the Rate at 7 per Cent.

6. Another Use of these Tables is to find very readily the Interest of any Number of Shillings by this Rule.

For

The Use of the Tables of Simple Interest.

For the Interest of an even Number of Shillings, take one Tenth of the Interest of half so many Pounds, and for the Interest of an odd Number of Shillings, take one Twentieth of the Interest of so many Pounds. For Example:

To find the Interest of 8 s. for 229 Days at 8 per Cent. The Interest of 4 l. (or half so many Pounds as the Shillings) is L. 0 : 5 : 2 : 2 ; and a Tenth of that is 6 d. 1 q. for Answer And thus:

s.		s. d. q.		l.	
The Interest of	1	For 343 Days at 8 per Cent. is	0 0 3 $\frac{1}{2}$	which is	of the Interest of
	2		0 1 3		
	3		0 2 3		
	17		1 3 1		
	18		1 4 1		
	19		1 5 0		for that Time.

Use 7. Of the Tables of Simple-Interest. When you would find the Interest of any Number of Thousand Pounds between 1 and 10. Take the Interest of 1000 l. at any Rate, as express'd in the Simple-Interest Tables, against the Word *Ditto*, (being the Interest of a 1000 l. repeated and wrote Decimally, for conveniency and exactness in Multiplication) and Multiply that by 1, 2, or 3, &c. the Number of Thousand Pounds you would know the Interest of: And from the Product towards the Right-Hand, cut off four Places for Decimals of a Pound, and what remains towards the Left-Hand of the Point, are Pounds.

Example. What is the Interest of 9000 l. for 271 Days, at 7 per Cent. Against (*Ditto*) in the the Principal Column, and under 271 Days, in the Table of 7 per Cent. is

L. 509216

Which Multiply by the 9 (the Number of Thousands) and the Product is

L. 467734

Or, L. 467 17 0 3

For the Value of the Decimal .7534, or of any other Decimal, is thus easily found by the little Table in the Margin.

The Decimal Table.

Decimals of a Pound.	Value.
	s. d. q.
.1	2 0 0
.2	4 0 0
.3	6 0 0
.4	8 0 0
.5	10 0 0
.6	12 0 0
.7	14 0 0
.8	16 0 0
.9	18 0 0
.01	0 2 2
.02	0 5 0
.03	0 7 1
.04	0 9 2
.05	1 0 0
.06	1 2 2
.07	1 5 0
.08	1 7 1
.09	1 9 2
.001	0 0 1
.002	0 0 2
.003	0 0 3
.004	0 1 0
.005	0 1 1
.006	0 1 2
.007	0 1 3
.008	0 2 0
.009	0 2 1

The Value of of

	s.	d.	q.
.7 is	14	0	0
.05	1	0	0
.003	0	0	3

Add

.753 15 0 3 Sum or Value sought.

You must observe the Place that any' Digit (or single Figure) possesseth from the Point for 7 next the Point (.) is 14 s. but if in the second Place from the (.) 'tis but 1 s. 5 d. and if in the third Place from (.) it is but 7 Farthings: So also.

The Value of

	s.	d.	q.
.9763 is	19	6	1
.8312	16	7	2
.0831	1	8	0
.0800	1	7	1
.0081	0	2	0
.1111	2	2	3

The Decimal Figures in the fourth Place, are of no Value worth Noting in this Case.

Use 8. And for the Interest of very large Numbers, as of upwards of 10000 l. You may multiply the Decimal Number, at the beginning of each Table foregoing (according to your Rate) by the Number of Days, and that Product by the Principal, as is shewed in the Sect. following.

sect.

SECT. III. The Use of Table V. (or that of Discount.)

Use 1. What is the Discount of 1000 l. from the third of March to the 19th of January following. I find by the Circle used as above, the Days in that time are 322. So that if against 1000 l. Principal, you look under 300, 20 and 2 Days, the Discount will appear to be L. 49 18 8 3, viz

Against 1000 l. and under 300 Days stands L. 46 10 5 3 }
 20 3 2 0 2 } = 49 18 8 3 Sum.
 2 0 6 2 2 }

Whereby it will be evident that

If I am oblig'd to pay 1000 l. at the end of 322 Days, but agree afterwards to pay it presently upon Allowance of the Discount at 6 per Cent. I must have L. 49 18 8 3, Deducted from the 1000 l. so that I must pay but L. 950 : 1 : 3 : 1.

Use 2. What is the Discount of 10000 l. for 292 Days.

The Discount of 1000 l. (against the Word *Ditto*) in Table V. for 200 is 31.0158 l.
 90 13.9561
 2 0.3102

By adding the Decimals (as all Pounds) the Sum is Days 292 L. 45.2831
 Which is the Discount of 1000 l. for that time, and being multiplied by 10

The Product is the Discount of 10000 l. for 292 Days, viz L. 452.8310

And the Decimal 831 being Reduced, as above, by the Table it will be L. 452 16 7 1.

And because the Discount at any other Rate of Interest cannot be found from the Table of Discount at 6 per Cent. as the Interest of other Rates may be (as it is shewed above,) therefore I shall insert as follows the Discount for One Day of One Pound, at several Rates of Interest, Any of which Decimal Numbers being Multiplied by the Number of Days, for which the Discount is to be, and that Product by the Principal, for which you desire the Discount, that second Product (without any farther Table) is the Answer.

The Discount of One Pound for One Day, at several Rates per Cent.

At	per Cent. it is,	Decimals of a Pound,
1	per Cent.	.00002712600027
2		.00005372011818
3		.00007979784545
4		.00010537407797
5		.00013046314416
6		.00015507883174
7		.00017923441300
8		.00020294266869
9		.00022621591052
10		.00024906600249
12		.00029354207436
20		.00045662100456

The Use of this little Table will appear in these two Respects:

1. When the Discount is required (as sometimes it may) at other Rates, than what the foregoing Table V. exhibits.

2. When the Principal (of which you want the Discount) is a very large Sum.

1. Suppose you would know the Discount of 700 l. for 310 Days, at 10 per Cent.

By this Table the Discount of One Pound for One Day, at 10 per Cent. is L. 000249066
 Which Multiply by 310 Days

310
 249066
 747198

Note : That when your Principal is 10000 l. or less, and the Days under a Year or 365, you need only to take the 9 first places of the Decimals in the Table, toward the Point or Left-Hand.

And the Product is L. 077210460
 Which Multiply by the Principal 700 l.

And the Answer is L. 54047322000

Or, L. 54 : 00 : 11. $\frac{1}{4}$ as by the Decimal Table above.

Exam.

Example 1.

What is the Discount of 1000000 l. for 360 Days at 9 per Cent. per Annum? See the Operation.

The Answer you see is 81437 l. 14 s. 6 d. 3 q. And tho' it must be confes'd, that a Man will rarely have occasion for the calculation of the Discount of such great Sums as this last; yet it may sometimes happen in cases of National Treasure, Banks, Projects, or the like; and for that reason I have given the Example, the better to illustrate the Use of the Table aforementioned, to which purpose I shall give also one other Example.

What is the Discount of 1500000 l. for 290 Days at 20 per Cent.

The Decimal of 1 l. for 1 Day, in the Table over against 20 per cent. is .00045661100456, which being multiply'd as in the last Example, by 290 Days, the Product is = .1324200913224, and that multiply'd by 1500000 l. the Principal, gives the Answer = 198630.1369836 l. or 198630 l. 2 s. 8 d. 3 q. by the Decimal Table aforementioned.

SECT. IV. Showing some easie ways of computing Simple-Interest by Vulgar Numbers, by Decimals, by Practice, and by Logarithms.

Quest. What is the Simple-Interest, for 1 Year, of 1463 l. 16 s. at 6 per cent.

100 l. 6 l. :: 1463 l. 16 s. 87 l. 16 s. 6 d. 3 q. Answer.

i. e. As 100 l. is in proportion to 6 l. so is 1463 l. 16 s. to 87 l. 16 s. 6 d. 3 q. the Answer. This is wrought by Vulgar Arithmetick, as in the Margin.

Here you see, by multiplying the Principal by 6, and dividing the Product by 100, the Quotient is 1756 s. (for to divide by 100 is only to cut off two places) and 36 (cut off) remains, which multiply'd by 12, producerh 672 d. which divided by 100, (by cutting off two Places as before) the Quotient is 6 d. and 72 d. remains, which multiply'd by 4, make 288 qrs. and that divided by 100, the quotient is 2 Farthings, and 88, hundred parts of a qr.

Note: The 1756 s. are reduc'd into Pounds by cutting off Units Place, and half the other Places are Pounds: As half of 17 is 8, half of 15 (with the 1 that remain'd) is 7, and the 1 that remain'd and the 6 cut off, is 16 s.

2d. Way. By Decimals, 'tis done thus:

100. 6 :: 1463. 8
6

87.828 l. Answer, or (by the Decimal Table) 87 l. 16 s. 6 d. 3 q.

3d. Way. By Rules of Practice. See the Work in the Margin, where the Answer is found, by taking one fifth of one twentieth of the Principal, and adding them together, the Sum is 87 l. 16 s. 6 d. 2 q. the Answer.

4th. Way. By the Table of Logarithms.

The Logarithm of 1463 8 is
The Log. of 6 l. the Interest is

From which take the Log. of 100 l.

And the rest is the Log. of 87.828 l. for Answ.

3.1654817428
0.7781512504 add

3.9436329932 Sum.

SECT. V. Rules to calculate the Tables of Interest and Discount foregoing.

To find the Simple Interest of any Sum, for any number of Days; as, Suppose the Interest of 1*l.* for 1 Day, at 8 per Cent.

The Proportion is $\begin{matrix} 1. & 1. & 1. & 1. \\ 100. & 8 :: 1. & 08 \\ \text{days } 1. & \text{day} & & 1. \end{matrix}$
 adly, $365. 08 :: 1. .000219178$ the Interest of 1*l.* for 1 Day.

And from this .000219178, the whole Table of 8 per cent. was calculated, and by an Arithmetical Progression thereof to 9 Terms, the whole Column for 1 Day was made as in the Margin, these being the Decimals all for 1 Day of the Interest of 1*l.* to 9; and if the Place next the Point is cut off by a downright Line, what Figures remains to the left Hand next the said Points are Pounds, and those to the right Hand are Decimals of a Pound for the next 9 Principal Sums from 10*l.* to 90 inclusive; then cutting off 2 Places in each Decimal next the Point, the Figures in those two Places will be Pounds, and the rest towards the right Hand, parts of a Pound, and are the Interest of the next 9 Principal Sums from 100*l.* to 900; And for the Interest of 1000*l.* for 1 Day, &c. I cut off the three first Figures of the first decimal Number for Pounds, and the rest towards the right Hand are parts of a Pound; and in like manner were the Columns of Interest for the other Day made, and at the other Rates.

1.	Int. 1 day.
1	.000219178
2	.000438356
3	.000657534
4	.000876712
5	.001095890
6	.001315068
7	.001534246
8	.001753424
9	.001972602

To calculate the Discount of Money.

This is best done by Decimals: As, Suppose I were to find the Discount of 1000*l.* for 90 Days, at 6 per Cent. the Proportion is

$\begin{matrix} 106. & 6 :: 1000. & 56.603774 \\ \text{Then as} & 365. & 56.603774 :: 90. & 13.9571 \end{matrix}$

To answer this Question, it requires two Operations in the Rule of Proportion.

1st. As 100*l.* and its Interest for 1 Year is to that Interest, so is 1000*l.* (or any other Principal) to the Discount thereof for a Year.

adly. As 365 Days is to 56.603774, the said Discount for a Year, so is 90 the propos'd number of Days, to (13.9571) the Answer. And thus the Table, foregoing, of the Discount of 1*l.* for 1 Day, at the several Rates of Interest was made: For Example.

What is the Discount of 1*l.* for 1 Day, at 6 per Cent.?

$106. 6 :: 1. .0566037735, \&c.$

Secondly, $365. .0566037735, \&c. :: 1 .0001550788 \&c.$ the Discount requir'd.

i.e. As 106. the Principal and Rate (as abovesaid)

Is to 6*l.* the Rate,

So is 1*l.* the Principal and Discount given,

To .0566037735, &c. the Discount of that Principal for 1 Year. adly. The Proportion is as 365 the Days in a Year

Is to .0566037735 the Discount for 1 Year

So is 1 Day

To .0001550788*l.* the Discount for 1 Day; and if a Progression is made of this last Number (as is shewed above for Interest) the whole Table of Discount is easily made therefrom by Addition.

The Use of the Tables of Compound Interest.

Sect. I. The Use of the 6th and 7th Tables foregoing, I shall shew in 4 respects.

I. In finding the present Worth of Annuities,

II. In finding the present Worth of Reversion of Annuities,

III. In shewing what Annuity any Sum will purchase: And

IV. In finding the Value of Annuities for a Life or Lives, where are given Rules for the Valuation or Estimation of any kind of a Life, and for two and three Lives.

I. *There is an Annuity of 500 l. per Ann. to continue 55 Years; What is its present Value?*
If the Estate be in Land (or any clear Income) look in Table the 6th, where under 55 and against 500 (of the Column of *l. per Annum*) you have the Answer 7995 l. 5 s. 5 d. 1 q.
If in Houses, see Table the 7th under 55 Years and against 500 l. per Annum, where you find 4973 l. 11 s. 0 d. 3 q. the Answer.

II. *What is a Lease of Land of 70 l. per Annum, to continue 34 Years after the Expiration of 10 Years in present Money? To know this,*
Add the Years in *est.* to the Years in Reversion and the Sum is 44; look in Table 6 under 44 and against 70 l. per Annum

And you will find

Then look in that Table for 10 Years, and against 70 l. per Annum, you will find

Which being deducted, the remainder is the Answer

If this Estate be in Houses, the Method of finding the Answer is the same; but you must take your Numbers from Table 7th.

III. To find what Annuity any Sum will Purchase is very easily done, and near enough the Truth by the 6th Table, if the Purchase be in Land, and by the 7th if it be Houses that are to be purchased.

Example 1.] What Annuity, to continue 61 Years of clear Income or Rent of Land, will 15000 l. purchase?

Rule.] Look for 15000 l. in the 6th Table under 61 Years, and the next Number there, less than the 15000 l. is 14571 l. 0 s. 5 d. 3 q. against which, in the Column of *l. per Annum*, is 990, and if you deduct 14571 l. 0 s. 5 d. 3 q. from the 15000 l. the remainder is 428 l. 19 s. 6 d. farthing; which if you look for in the Column under 61 Years, the next Number, less than it you will find 323 l. 16 s. 0 d. 1 q. right against which in the Column of *l. per Ann.* is 105 l. and deducting the 323 l. 16 s. 0 d. 1 q. from 428 l. 19 s. 6 d. 1 q. the remainder is 105 l. 3 s. 6 d. The next Number less than which under 61 Years is 97 l. 2 s. 9 d. 2 q. right against which, in the Column under *l. per Annum* is 6 l. And the 97 l. 2 s. 9 d. 2 q. being taken from 105 l. 3 s. 6 d. the remainder or surplus of the Purchase-Money is 8 l. 0 s. 8 d. 2 q. which being less than will Purchase 1 l. per Annum, is not material to proceed any farther with, but by comparing it with the Sum in the said Column of 61 Years, which will Purchase 1 l. per Annum, you may perceive that the 8 l. 0 s. 8 d. 2 q. will Purchase about 16 s. per Annum. So that the Annual Sum which 15000 l. will Purchase to continue 61 Years at 6 per Cent. Compound Interest, is 916 l. 16 s. per Annum.

Example 2.] Admit an House is Let for 50 l. per Ann. and 300 l. Fine, What Rent does the Tenant pay in all, considering his Fine, and supposing his Lease 49 Years?

Rule.

Rule.] Add the Annuity that 300 l. will Purchase for 49 Years (as shewed before, and in the Margin) to the Annual Rent paid, and the sum is the whole Rent that the Tenant may be said to pay for his House. This is done by Table 7th.

Answer l. 80: 5: 8

IV. To find the Value of Annuities for Lives.

All the difference between Questions of this Nature, and those under the first Head, is to make a rational computation how long a Person of any Age may be supposed to live, for when you have estimated the Years of Vitality, the present Worth is easily found by the 6th or 9th Tables of Annuity to continue those Years.

And because the true Value of Lives are different according to their Age, (as is shewed by the learned Mr. Halley, Savilian Professor of Geometry in the University of Oxford, in his judicious and elaborate Observations to the Royal Society, concerning the Bills of Mortality of Breslaw, the Capital of Silesia in Germany, which were printed in the Philosophical Transactions of the Year 1692.) I shall here insert the Table which he gives us from the said Bills of Mortality (which were communicated to the Royal Society by one Mr. Justell, wherein both the Ages and Sexes of all that dy'd were Monthly deliver'd and compar'd with the number of the Births for the Years 1687, 88, 89, 90 and 91, seeming to be done with all the Exactness and Sincerity possible) which Observations are the result of more Operations than most People can apprehend, but the several previous and very prudent Considerations on which this Table is founded, I have not room (nor is it necessary) to exhibit here.

A Table, shewing the Value of a Life at several Ages thereof.

Age.	Years Purchase	Age.	Years Purchase	Age.	Years Purchase
1	18:28	37	11:27	58	9:21
5	13:48	38	11:72	59	8:51
10	11:44	39	11:12	60	7:50
15	10:33	40	10:57	61	6:54
20	12:78	45	9:21	70	5:12

The Use of this Table.

1. Admit it were required to know what an Annuity of 65 l. per Ann. is Worth in present Money for 1 Life, which suppose 45 Years of Age.

Against that Age in the Table you have 9 Years Purchase, and 91 hundred Parts of a Years Purchase, therefore multiply 9.91 by 65 l. the Annuity, and the Product is 644.15. or 644 l. 3 s. for by the decimal Table beforegoing the .15 is 3 s. See the Work in the Margin.

9.91
65
—
644.15
3945

Answer 644.15

And by the same Rule 65 l. per Annum for a Life of 15 Years of Age, is Worth 866 l. 9 s. 0 d.

2. For the valuation of Two or Three Lives, it has been usual to reckon 1 Life as a Lease of 7 Years; 2 as 14; and 3 Lives as a Lease of 21 Years; but this is manifestly too little; for 21 Years Lease is but worth 11.76 Years Purchase by Table 9. Column 4. at 6 per Cent. whereas the Value of 1 Life, by the last little Table of Mr. Halley's, is (in a medium of all that are there mentioned 10.4 (or near 10 Years and a half Purchase) and the value of all the single Lives under 36, are worth more, each Life, than 10 Years Purchase. I propose therefore, that for two Lives, as suppose 60 l. per Annum for the Lives of 40 and 45.

1. See what the Years Purchase of the Older Life is, by the said last little Table, where against 45 Years of Age you have 9.91 Years Purchase. 2dly, Look for that 9.91, in the 6th Column of Table 9th (for that Table shewing the present Worth of 1 l. Annuity, to continue any number of Years to 61, the Numbers therefore against the Years, are Years—Purchase)

chase and Parts); but because you cannot find that 9,91, take the next to it, which is 10,10, (the rest of the Decimal towards the Right Hand you may omit) right against which 10,10, and in the Column of Years you have 16, which shews that 10,10 Years Purchase is equal to 16 Years Lease, at 6 per Cent. And if to the 16, you add the Years which the Younger Life differs from the Elder, (viz. in this Example 5.) the Sum is 21. 34 Look in Table the 6th for 60 l. per Ann. and under 21 Years you have the Value of 2 Lives, viz. the Oldest, and Reversion, (or 5 Years, which the Younger Life may reasonably be supposed to out-live the Elder) which answer is 1 705 16 10 3.

Examp. of 3 Lives. And for three Lives, if to that Sum you add a Years Value (here 60 l. more, for the Chance that the middle Ag'd Life may survive the rest, (as that is according to the common Custom in most Parts of England of making up 2 Lives in esse, 3 Lives) the Sum or Value of the Lease for three Lives is 1 769 16 10 3.

Examp. 2d. of 3 Lives. But because I would make this Part as easie and certain as I can, I shall give another Example or 2, which you may do with the last little Table and the 4th Column of Table the 9th.

Suppose any Lease of any clear Annuity to be sold for 3 Lives, the Oldest of which is 50 and the Youngest 41.

Here as before: Look in the last little Table for 50, the Older Life, and against it you have 9,21 Years Purchase.

1. Then look in the 4th Column of Table 9th for 9,21, and right against that in the Column of Years toward the Left Hand you have against 9,29 (which is the next to 9,21) 14 Years Lease.

2. To that 14 add the difference between the Oldest and the Youngest Lives, viz. 9, and the Sum is 23. Look for that in the said Table 9 in the Column of Years, and right against that, toward the Right Hand in the 4th Column you have 11,46 Years Purchase for the value of the said 2 Lives.

3. Then for the middle Life add a Years Purchase and the Sum is 12,46, or 12 Years and near a half Purchase, the Answer, which being multiply'd (as in the first Example for 1 Life) by your Annuity, the Product (supposing the Annuity 45 l. per Annum) is 560 l. 14 s. for 7 of a Pound, by the Decimal Table, Page 91 is 14 s. so that 45 l. per Annum for 3 Lives is Worth, by this Rule, 560 l. 14 s.

But you are to observe, that this Rule will serve best when there are not above 7 Years between the Youngest and Oldest Life.

It may also not be much out of the way, tho' 10 Years are the difference: And tho' in all Customs and Books of this kind there are little or no Notice taken of the Age of the Lives, (for they only value a Lease for 1, 2, or 3 Lives in general) yet the Age of the Lives makes a great difference, as appears by the said foregoing little Table, for 1 Life, and according to the Rule above, the like is visible (by the Examples following) for two and three Lives.

But because, if above 10 Years is the difference of the Oldest and Youngest Lives, the chance is considerable whether the Younger may survive to the other's Age, provided the Elder's Age is 55 or upwards; therefore it may not be amiss in case of 15 Years difference (when the Elder is 55 to 65) to deduct 1 Year's Purchase. If 20 Years be the difference, deduct 1 Year and a half's purchase. And in case of such difference when the Elder is 65 and upwards to 70, you may deduct 2 Years purchase the value as above sought, when 15 is the difference of

Ages of Eldest and Youngest.	Value of the Elder; Years Purchase.	Value of the Eldest and Youngest.	Value of the three Lives. Years Purchase.
9 }			
16 }	13.33	14.49	15.49
13 }			
15 }	13.33	13.76	14.76
20 }			
26 }	12.27	13.59	14.59
25 }			
30 }	11.72	13.00	14.00
27 }			
33 }	11.12	12.78	13.78

the Rule above, the like is visible (by the Examples following) for two and three Lives.

the Ages, and 3 if 20 is the difference. I do not affirm the infallible certainty of these Rules relating to so uncertain Matters as Lives are; but believe they are pretty equitable.

Note, That this is only for Leases for Lands, Houses being rarely Lett otherways than for Years certain, which are valu'd by Table 7th, as has been shew'd.

SECT. II. The Use of Table VIII.

By this Table, I think I may truly say, that all Questions relating to the Value of Church or College-Leases of their Land, are answer'd with much more Ease, Expedition and Exactness, than by any other Tables extant, of which two are mention'd in the Preface.

Example 1.] Admit there is a Church-Lease of Lands taken for 21 Years, as usual, of 70 l. per An. and that 5 Years of this Lease is laps'd or expir'd, How much Money ought to be paid by the Tenant as a Fine to make up his Lease 21 Years. Look in Table VIII. under 5 Years laps'd and 70 l. (annual Rent) and there you find L. 44. 3. 11. 1. the Fine requir'd.

Example 2.] What is the Fine supposing 9 Years laps'd of the 21 Years Lease, and that the Rent is 147 l. per An.

	L. per An.	Fines.
Under 9 Years laps'd against	100 is L. 145	13 9
	40	58 5 6
	7	10 3 11 57.

Sum Tot. L. 147 Sum L. 214 03 227

Example 3.] To Make up a Lease of 14 Years, any number of Years less than 21. Consider what the Years are that you would add, and subtract them from 7, then deduct the Fine payable for the remaining Years from one Year's Purchase, and the rest is the Answer. Thus if you would add only 5 Years to 14, take 5 from 7, and the remainder is 2, suppose the Annuity be 40 l. per An. from 40 l. take the Fine payable for 2 Years laps'd L. 8 10 1 1 and the remainder is L. 31 9 10 3, which Fine makes up your Lease 19 Years.

Example 4. If you are to purchase or sell a Church-Lease, the last Column of Table 8 shews the Value: As suppose a Lease of 80 l. per An. is to be sold, the Seller having made up his Lease 21 Years. Look in the said Column, and against 80 l. per An. you have L. 622 0 1 1, the Sum to be paid by the Purchaser. I need not tell the Reader that in Case of Improvement, he may by this Table find the Value according to the improv'd Rent.

SECT. III. The Use of Table IX.

This, and Table the 10th, I have put in Decimals, because the three first Columns of each are seldom us'd; and for the 4th Column in each Table (which are by much the most useful) I have made from thence Tables, the 6th and 7th, but have inserted them in Decimals here for the more easy Calculation or Enlarging them to any greater number of Years. But tho' these 2 Tables are Decimals, the Reader will find their Use very easy if he observe to Multiply, Add, &c. the Decimals as tho' they were Pounds, or other single Denomination: 2dly, To cut off so many places (when multiply'd) from the right hand of the Product for Decimals as there are Decimal places in the Number to be multiply'd together: And 3dly, To value the Decimals in the result by the little Table for that purpose on Page 92.

Use of Column 1.] What is the amount of 15 l. being forborn at Interest upon Interest for 61 Years at 6 per Cent.? Look against 61 Years, and you will find 34.966952, which is the Increase of 1 l. in that time, and being multiply'd by your 15, produceth L. 524 10 1, the Increase of 15 l. in 61 Years.

Use of Column 2.] What is the present worth of 520 l. due at the end of 61 Years. Multiply the Sum in this Column against 61 Years by 520, and the Product is L. 14 17 5 1, as appears in the Margin; and by the same Rule, the Value presently of L. 524 10 1, due 61 Years hence, is 15 l. as you will find upon Tryal; which proves the Truth of the 1st Question.

2. What is 10000 l. due 5 Years now to come, worth in present Money? Against 5 Years in this 2d Column, is 7472582, which multiply'd by 10000, the Product is, L. 7472 11 7 3) 74725 82.

Use of Column 3.] Admit an Annuity of 70 l. per An. is forborn 17 Years, What is the Amount hereof Interest upon Interest at 6 per Cent.? Look against 17 Years, and you will find _____ which being multiply'd by the Annuity, here _____

$$\begin{array}{r} \text{Multiply } \left\{ \begin{array}{l} 34.966952 \\ 15 \\ \hline 174834760 \\ 34966952 \\ \hline L. 524.504280 \end{array} \right. \end{array}$$

$$\begin{array}{r} \text{Multiply } \left\{ \begin{array}{l} 0285984 \\ 520 \\ \hline 571568 \\ 1429920 \\ \hline \text{Product } L. 14.8711680 \end{array} \right. \end{array}$$

The Product is, L. 1974: 18: 0: 1 _____ 1974 9016420

The Use of Column the 4th, I need say no more of, in regard I have shew'd it in finding the Value of Leases for Lives, Page 224 and in the Use of Table the 6th, which is of the same Nature with, and is made from this Column the 4th. And the Use of the Columns in Table 10, are in all Cases the same with the respective Columns in the 9th Table, and the Use of the 4th Column of Table 10, is the same as Table the 7th, which is made from this Column 4.

SECT. IV. To make these Columns of Compound-Interest subservient for any greater Number of Years than 61. And how to Answer Questions of the same Nature as above by the Logarithms.

1. By the help of the 1st and 2d Columns from that of Years in Table 9.

Proposition 1.] To find the Amount of 24 l. for 110 Years, at 6 per Cent.

Take any 2 Numbers in the Column of Years whose Sum makes 110, as here; I will pitch upon 60 and 50, in Column the 1st, and against 60 Years is 32.9876909, which being multiply'd by the Number (in the same Column) which stands against 50, viz. 18.4201541, the Product is L. 607.638341, &c. which is the Increase of 1 l. in 110 Years, and that being multiply'd by the principal 24 the Product is L. 14583 3103 or L. 14583: 6: 5 five which is the Amount of 24 l. in 110 Years.

Prop. 2.] To find the present Worth of 600 l. due at the end of 110 Years, at 6 per Cent.

This is done by the 2d Column from that of Years, where the Number against 50 Years is .0542884, and against 60 is .0303143, which Decimals multiply'd together produce .00164571, &c. which is the present Worth of 1 l. due at the end of 110 Years, and being multiply'd by 600, that Product is .98743 or 19 s. 9 d. the present Worth of 600 l. due 110 Years hence.

Prop. 3.] To find the Amount of 3 l. per An. to continue 110 Year, at 6 per Cent.

First, Find the Amount of 1 l. for 110 Years (as under the 1st Prop.) which is 607.638343. 2dly, Find what Principal will raise your Annuity 3 l. at 6 per Cent. Thus, as 6 is to 100, so is 3 to 50; by which 50 multiply the said L. 607.638343, and the Product is 30381.91715, which is the Amount of 50 l. in 110 Years; from which subtract 50 the Principal, and the Remainder is L. 30331.91715 or L. 30331 18 4 the Increase of 3 l. per An. in 110 Years: Add thus Questions of the like Nature with Column 3, are answer'd.

Prop. 4.] To find the present Worth of an Annuity at 3 l. per Ann. to continue 110 Years at 6 per Cent.

Find, as above, by the Rule of Proportion, what Principal will raise the Annuity given; as here 50 l. will. Then find the present worth of 1 l. due 110 Years hence as you did under Prop. 2. which is .00164571, that multiply'd by 50 (the said Principal) produceth .0822857, which is the present worth of 50 l. due 110 Years hence. Lastly, Deduct .0822857 from the Principal 50, and the Remainder is L. 49.917, the present worth of 3 l. per An. to continue 110 Years. The Decimals as per Table in Page 92, being reduc'd, the Answer is L. 49 18 4. And thus Numbers (for any time) of the like Nature with those in Column the 4th, are found: And by the very same Method Numbers for any larger Term of Years than those in the 4 Columns of Table 10 are discover'd.

2 The Four Propositions above Resolv'd by the Logarithms, as follows.

Note, That 1.06, which you will find often mention'd in the following Resolutions, is One Pound, and its Interest for a Year at 6 per Cent, at which Rate the Interest is above, and as follows computed.

Resolution 1.] To find the Amount of 24 l. in 110 Years by the Tables of Logarithms. Multiply the Logarithm of 1.06, which is 0.02530586 by 110 the Number of Years, and the Product is 2.78364460, which is the Logarithm of L. 607.64 the amount of 1 l. in 110 Years; to which last Logarithm add the Logarithm of 24 l. the Sum propos'd, and the Aggregate is 4.16385584 or the Logarithm of L. 14583.32, which proves the Answer to Proposition 1.

Resolution 2.] To find the present worth of 600 l. due at the end of 110 Years. Find the Logarithm of the Amount of 1 l. in 110, which is 2.78364460, as before, and deduct that from the Logarithm of 600 l. viz. 2.77815125 and the Remainder is 1.99450665, which is the Logarithm of the Answer, as under Prop. 1. viz. of 98743 or 19 s. 9 d.

Resolution 3.] If you would know the Amount of an Annuity; As suppose 3 l. per An. to continue 110 Years. Find the Amount (as in the 2 Resolutions above) of 1 l. to continue 110 Years, which is L. 607.64; then from the Logarithm of 607.64 made less by 1, viz. of

606.64 = 2.78293104, deduct the Logarithm of 1.06 less 1, viz. of .06, which is 2.77815215, and the Remaining Logarithm is 4.00477889, which is the Logarithm of the Increase of 1 l. Annuity to continue 110 Years; to which add the Logarithm of 3 (the proposed Annuity) viz. 0.47712125, and the Sum is 4.48190014, which is the Logarithm of 30331.917 = the Amount of 3 l. per An. in 110 Years; which proves the Truth of the Rules under Proposition 3.

Resolution 4.] If the present Worth of an Annuity is requir'd: As suppose of 3 l. per An. to continue 110 Years. Find the Logarithm of the Amount of 1 l. in 110 Years (as under Resolution the first) which Logarithm is 2.78293104, to which add the Logarithm of 1.06 less 1, viz. of .06, which Logarithm is 2.77815215, and the Sum is 5.56108319, which subtract from the Logarithm of the Increase of 1 l. in 110 Years, less 1, viz. of 606.64, whose Logarithm is 2.78293104, and the Remainder is 1.22113429, which is the Logarithm of 16.639 = the present Worth of 1 l. per An. to continue 110 Years; To which last Logarithm add the Logarithm of 3 l. (the Annuity) viz. 0.47712125, and the Sum is 1.69825554, which is the Logarithm of 49.917 the Answer, as under Prop. 4.

Sept. V. How the Tables IX and X of Compound-Interest were Calculated, and may be Enlarg'd, or by the same Rules new ones at other Rates of Interest (if found of any Use) may be made.

I. The 1st broad Column of Table IX, was thus made at 6 per Cent. As 100 l. to 106; so is 1 l. to 1.06, the 1st Number.

Years.	The Amount of 1 l.	The present worth of 1 l.	The Amount of 1 l. Annuity	The present worth of 1 l. Annuity.
61	34.966951981	.028598429	566.115867858	16.190026123
62	37.064969099	.027357008	601.082819839	16.217383130
63	39.288867244	.025808498	638.147788940	16.243191628

The second Number in that Column was made by multiplying 1.06 by 106, and dividing the Producting by 100, and so forward to 61. Every Number is produc'd by multiplying the Number preceding in that Column by 106, and dividing the Product by 100; and thus 37.064969099 is found by multiplying the Number against 61 Years by 106, and dividing by 100, and so the rest in that Column, to what Number you please.

II. The second Column] from that of Years, is made on the contrary by multiplying 1 by 100, and dividing that product by 106, the quotient is the 1st Number in that Column 1.9433962, and so on to 61 Years. Every Number is produc'd by multiplying the preceding Number by 100 and dividing that product by 106. And thus the Number in this Column against 63 Years, viz. .027357008 (against 62 Years) and that so multiply'd and divided gives you the Tabular Number for 63 Years, viz. .025808498, and so you may proceed.

III. The third Column] from that of Years is thus made, Add together the Tabular Numbers standing against the same Years in the 1st and 2d Columns, as the 1st Number in the 2d Column is always 1, which added to the first in the 1st Column, viz. 1.06, the Sum is 2.06 which is the 2d Number in the 2d Column, &c. So the Numbers against 61 Years, viz. 34.966951981 and 566.115867858 being added, the Sum is 601.082819839 the Tabular Number in the 3d Column against 62 Years. And the Sum of 37.064969099 in the 1st, and 601.082819839 in the 2d Coll. is 638.147788940, the Tabular Number in the 3d Column against 63 Years, And so you may proceed to what Number of Years you please.

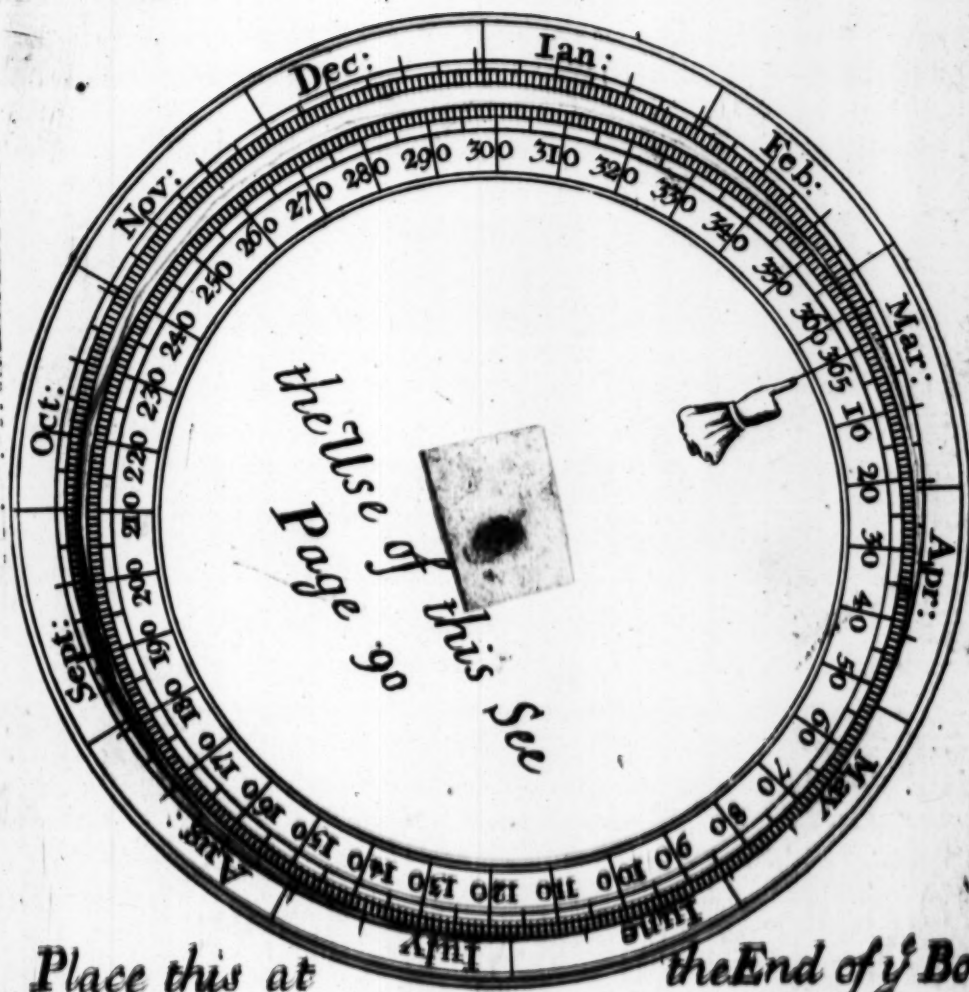

IV. The 4th Column] has its first Number the same with that of the 2d Column. And if you add any Number in the 4th Column to the Number standing in the next place of the 2d Column, the Sum is the next Tabular Number for the 4th Column: Thus 16.190026123 (against 61 Years in the 4th Column) added to .027357008 (the Number against 62 Years in the 2d Coll.) the Sum is 16.217383130, the 2d Number in the 4th Column, &c. I have put the Decimals down at large for more Exactness in continuing the Columns to any Number of Years.

F I N I S.

A Table, shewing the Pounds, Shill. &c. in 340 Guineas and the Contrary, &c.
